

# SPIDERS!

## HUNTING THE HUNTERS!

### FREE WORKSHOP

**The recent rains in Alice Springs have brought out masses of insects, but they are not alone!**

Alice Springs, and your garden, is home to an impressive diversity of spiders! Right now these incredibly well adapted miniature predators are hatching plots to cash in on the new crop of insects – it's like an Attenborough documentary playing out every night right in our own back yards!

Robbie Henderson (former invertebrate keeper from Desert Park and bug enthusiast), and Alan Henderson (Manager "*Bugs Alive*", Melbourne Museum), will throw some light on the fascinating habits of our local spider fauna. Come along to find out who's who of spiders in your backyard, and how they make a living. Pick up some tips on spider photography, and bring your torch... You will be guaranteed to look at spiders in a different light...

**WHERE:** Olive Pink Botanic Gardens

**WHEN:** Thursday 18<sup>th</sup> February, 7pm

**BRING:** Torch, Camera

**RSVP:** Ilse on 8955 5222/lfw@lowecol.com.au
